

## **F**ormative Assessment

- A. Tell whether each experiment is binomial, hypergeometric, or Poisson.
1. Take a random sample of 100 children and check if they attend school or not.
  2. From a group of 20 students, a random sample of 5 will be taken and the number of officers from the list will be counted.
  3. Ask a random sample of 50 shampoo sample users on how many are satisfied with the product.
